AEROCOIN

To issue a new coin in the digital world suppose a challenge that seems to go beyond central banks. The new term in digital economy is "Token", a unit of value created by organizations to govern its business model and give more power to users and interact with their products in addition facilitating the benefits distribution among all shareholders. This definition is given by William Mougayar, author of the book 'The Business Blockchain'.

"**AEROCOIN**" is committed with this new business model. Our Token has been created as a crypto open to investors through main Exchanges pools globally where the main objective is to be used as regular payment method in the aero industry, to be accepted by companies in multiples industries all around the world and to support Aeronautical Projects as well.

An exchange for passenger tickets in air routes, aeronautical services and supplies for airlines among others and are examples to be promoted in the investment found for the Aero Industry which are connecting South America with North America, Europe, Africa and Asia.

Technological Base

AEROCOIN is supported on the Binance Smart Chain (BSC) network, which makes it into an auditable and transparent digital financial instrument that will facilitate the acquisition trust and exchange. Based on Blockchain Method that allow transferring information safe without any third parties. This technology constitutes the fingerprint of the digital process and consider as the validation source for a digital currency.

Security as a key driver for the token development adding a 24/7 support, we bring to the market a crypto currency that can be effectively used for exchanged in financial processes.

What is AEROCOIN?

It's the first digital Token created by a commercial airline company. This marks an unprecedented milestone in the region. With a strong and well-structured tangible business plan with a strong values vision.

These Token will be a financial exchange tool at a macro, meso and micro economic level that will allow financial resources mobility and their digital transformation into their equivalent in any type of currency or cryptocurrency.

How to buy?

The Token will be gradually included in the main International Exchanges, where we have been working with, interactions with they're technical and financial staff to move forward with partnership agreements.

Today AEROCOIN (ACN) soon be available the Pancake Swap Exchange. AEROCOIN will work as any other Crypto in the global community and the price will be determined by the market.

The technical description of the digital Token developed by aerocoin.us and supported by the Binance Smart Chain network (BSC), will be named

AEROCOIN called as per the acronym ACN as the Token and Aeros for a decimal Tokens fraction.

The ACN is the acronym that will be enounced in the exchanges and the AEROS represent the decimal unit fraction of the currency represented as the following: Aeros (1/1,000,000,000,000). Another way of saying is: 1AEROS= 0.000000000001. equal to the millionth part of the unit of one (1) AEROCOIN.

Our offer to the market

The pandemic has impact dramatically in the Airline Business industries where must of governments have been supporting and helping mayor airlines all around the World.

AEROCOIN has been crated as a Crypto to rise founds to support the aero companies to face these and many other challenges industry specifics.
